

Korebase builds custom software for companies that outgrew off-the-shelf solutions. We specialize in enterprise applications for office, manufacturing, distribution, and government environments — from Customer Applications / ERP Solutions to AI-powered automation.

Senior developers only. The person you talk to is the person writing your code. No junior devs, no offshore handoffs.

PAST PERFORMANCE

Proven delivery across commercial and public sectors:

- **Fortune 500 Technology** • **National HVAC Distributor**
 - **Manufacturing & Distribution**

Sample Projects:

- Enterprise Warehouse Management System with JD Edwards/Oracle ERP integration
- End-to-End Sales CRM covering lead generation through delivery tracking
- Custom ERP modules — inventory, order processing, production tracking
- Multi-agent AI pipelines for business process automation
- CCNP-level network engineer Training

CORE COMPETENCIES

 **Custom Application Development**

 **Workflow Automation**

 **AI Consulting & Integration**

 **Systems Integration**

 **Network Engineering Training**

 **Enterprise Reporting**

DIFFERENTIATORS

- **Senior Developers Only** — Every line of code written by experienced engineers who understand your business.
- **Deep Domain Expertise** — Manufacturing, distribution, ERP. We've built systems in your industry.
- **AI-Ready Operations** — Production multi-agent AI systems, autonomous pipelines, and LLM-powered tools for real business problems.
- **Brutally Honest Communication** — We'll tell you if your solution won't work or if there is a cheaper option.
